Mutiny in Regular Army Delights Ulster Rebels Both Sides Working to Avoid Conflict.

London, March 22-The dreaded Sunby passed without the slightest dis-rbance in Belfast or in Ulster. But the gravity of the crisis is fully indicated by the fact that the king can-celled his intended week-end visit to the idari and Countess of Derby at Liv-eipool. The king and queen also cancelled their proposed visits to the race Thursday and to the grand national race Friday.

The king is strongly advocating concitization and seems to have made a personal appeal to officers who resolv-ed to lesign rather than face the possibility of being called on to fight in Used It is taken for granted that the king is exerting his influence also with his ministers in the same conciliatory direction.

Working to Avoid Conflict. The desire on both sides that every-thing possible should be done to avoid any chance of conflicts is plain. The nationalists have abandoned their pro-posed parade at Londonderry, and Sir Edward Carson, the Ulster unionists' leader, continues to voice his desire to pievent provocative acts

he government announces that all Intended troop movements in Ireland have been completed, but this may be a decision necessitated by threatened resignations of officers Apparently no further actual resignations have been offered Numerous questions to asked in parhament tomorrow should bring forth reliable information on what at present is a somewhat obparty feeling

As the result of a meeting of the par-ty loaders, Andrew Bonar Law will move the adjournment of the house with a view to obtaining a discussion of the whole situation

The prime minister conferred for an hour with the king today, and the utmost activity prevails in all govern-ment quarters Among the political leaders tonight, however, the situation is considered more favorable.

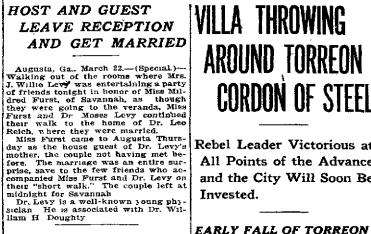

An official report issued tonight vs all the proposed troop movements

in Ulster have been carried out "These movements," the report as-serts, "were of a purely precautionary nature with the object of giving adequate protection to the depots of giving ade-ammunition and stores and other gov-ernment property against possible risks There has not been and is not now any intention to move troops into Ulster except for these and like pur-poses"

Premier and King Confer.

Premier and King Conter. Conferences between King George, Premier Asquith and other ministers with reference to the Uister situation continued all day. more that the enemy would make a show of resistance at Gomez Palacio, a suburb of Torreon, reached by street a guarda of forein, reached by Street car, and noted for its big railroad shops. Normally, Gomez Pulaces is a junction poolit, where passengers change cars for Montercy. It lies in junction the shadow of a great brown hulk of a mountain, known as Cerre La Pila, which the federals are reported to have fortified. If this proves true, the po-sition must be taken, as the big spins days ample power to cover the three miles between the mountains and Tor-

reon It is said the manning of La Pila would be a legitimate part of the de-fense of Torreon, although its com-parative isolation would make support from other parts of the federal defenses virtually impossible. The de-fenders would be in danger of being absolutely cut off, and for this reason the rebels doubt that the enemy, if

The country-side between Gomez Palaclo and Torreon is laced with irrigation ditches and in the irrigating season is rich with cotton and other orops. It is thickly settled and the wintewashed adobe farmhouses fairly sparkle with the sunlight It is re-ported the federals have let the water into some of the ditches to impede the rebel advance, while others are being utilized as trenches for the protection The first use tenders and rapid-firing guns The first important movement of the week just passed took place when General Villa, having appeared sudden-

When the play was first pro-duced the Bishop of Kensington was in the midst of his crusade against Gaby Deslys and company and their shocking behavior on the stage, and all the critics in town, heping to be on the side of the angels, banned the undress-ing scene in "Who's the Lady." Much to their surprise the clerical critics could discover nothing objectionable in the scene, and the play has been a great success. The local dramatists were not long in taking their cue. Cyril Harcourt, whose 'A Place in the Sun," although hot a financial success, marked him out as an uncommonity clever play-wright, introduced a bedroom scene in mis latest play. "A Pair of slik Stock-ings," and Joseph Keatlag used a bondoir undressing scene in "Peggy and Her Husband," which has just been produced and almost immediately with-drawn at the Royalty theater.

One manufacturer of food-stuffs, after having been thoroughly investigated and pronounced above reproach, has almost doubled his output in a year.

He tells his story in his advertisements in the daily newspapers. He knows he prepares wholesome food and does not hesitate to guarantee it in every way. The public knows it now and responds by demanding his product from retailers.

The manufacturers who adulterate their products do not dare come out in the open and advertise.

By watching these advertisements in The Constitution, you are able to find out who are the honest manufacturers, and buy accordingly.

Retailers must read the signs of the times, stock their shelves and display in their windows the kind of foods that an educated public demands.

Every new home established this spring by a newly-married couple should first subscribe for The Constitution and form the habit of buying from its advertisers. This is an efficient plan of household economy.

ALL THE RADIUM SUPPLY **CONTROLLED BY EUROPE**

Director Holmes Says Americans Failed to Recognize Importance of Radium.

Washington, March 22.-How the American people failed to recognize the importance of radium as a cancer cure until European countries had ob-tained virtually all of the present available supply, is graphically told in the annual report of Joseph A. Holmes, director of the federal bureau of mines, made public tonicht. The report tells made public tonight. The report tells in detail of the bureau's unsuccessful efforts to obtain a quantity of radium sufficient to supply the twenty or more hospitals of the public health service and "serve, in part, to meet the needs of the various cancer hospitals of the country."

country." Director Holmes estimates that "in the United States 75,000 persons die each year from cancer." Explaining that radium is considered the most promising cure for certain types of can-cer, the director says the most serious barrier to progress in demonstrating this is the scarcity of radium. to purchase the new Encyclopaedia Britannica at low prices will soon be reached. An increase of \$29 to \$50 a set will then be made in the price. You will effect a substantial saving by buying now.

The Editor or Journalist

or any wide-awake Writer or Reader will benefit by using The New Encyclopaedia Britannica (11th Edition) because it is different from any other work of reference, especially in being dearly, attractively written by great authorities, chosen from all over the world, who know their special subjects and know how to tell about them to other people.

For instance, in the Britannica, the article NEWSPAPERS is by Lord Northeliffe, Hugh Chisholm, former editor "St. James Gazette" and now day-editor. "London Times," and C. K. Shorter, editor "The Sphere."

TYPOGRAPHY (60,000 words) is by J. H. Hessels, author of "Gutenberg—an Historical Investi-gation," John Southward, author of "A Dictionary of Typography," and H. M. Ross, editor "London Times Engineering Supplement."

And there is the same constant note of authority in all other subjects in the Britannica-whether you turn to it

for information about paper or bookbinding or libraries; for a critical summary of the

career of a figure in the French Rev-olution or in the history of Japan; for a biography of Benjamin Franklin, or Horace Greeley, or Charles A. Dana, or E. L. Godkin,

or Henry J. Raymond; for impressionism or post-

impressionism in painting; for the location and import-ance of an out-of-the-way town in

Australia or in Zanzibar; for a point of law bearing on a will, a poisoning case or an insur-

coves, nooks and hills of north Georgia offer territory naturally adapted to develop a tremendous apple industry. The altitude, the precipitation, the soil and other factors are just right. The process of demonstration has gone from the academic to the concrete. Three years ago Rabun county apples won a first prize at the National Apple show, in Spokane, at the heart of the famous Pacific apple orchards. Recently, products from the same locality carried off blue ribbons at a national show

Those that come down from that region sell like hot cakes at high prices. Apple growing is not so precarious, not so much a matter of By Cartier. In Atlanta, 55 cents per month or 12 cents per week. These and other facts will be demon strated at the Cornelia convention, March 28. Several fortunes in growing apples are awaiting the capitalist and the small farmer in the Blue Ridge belt.

LETTERS WITH PACKAGES.

The parcel post adds another chapter to its brief, but phenomenal, history with the signing of an order by Postmaster General Burleson which permits the sending of a letter with a parcel. The letter must, of course, carry its own postage and be addressed to the same party receiving the parcel. When that condition is fulfilled. the letter may be attached to the parcel and, therefore, assured of delivery with it. The improvement here recorded is bound to further popularize the parcel post. Heretofore, this branch of the postal department has been forced to progress against the handicap of the regulation which forbade written matter, save the address, to accompany a package. The new order lifts this embargo, and will, undoubtedly, stimulate the popularity of the parcel post, as it will the revenues of the government

It is doubtful if in any country there has been witnessed the remarkable degree of evolution visible in the growth of the parcel post in America. That activity of the postoffice department has been in operation for a period of a trifle under fifteen months. And today the parcel post is a part of the life of every rural community, as it is of the equipment of most of the mail shippers of the city.

If the growth of the past is a prophecy of the future, the forecast is safe that within the next five years the parcel post will be proved not only as a tremendous agent for developing the rural districts, but equally for increasing by a large numeral the reve nues of the government.

Threat-Laden Issue of Interlocking Directorates **Makes** Congress Cautious

By John Corrigan, Jr. Witshington, March 22.—(Special.)—Both branches and all political parties in congress are more perturbed over the anti-trust and interlocking directorate legislation now pending than over the Mexican situation or, indeed, any single issue of national impor-tance that has developed since the inaugu-ration of Wilson. All tendency to treat or approach the subject lightly or with impulse has given way to the sober realization that under any conditions and with the most cautious Intention it is laden with possible threat to the business of the country. From President Wilson on down the injunction is "Go slow" So chary are the democrats of treading on the toes of the public or busi-ness sentiment of the country that it would not be really surprising if tinkering with the question went over until next fall, the party standing pat before the voters on the new tariff and currency laws and the good roads bil, which seems sure of enactment. The Sheep and Goats. The delicate problem contronting con-gress is just this: "How are we going to frame 2 law that will reach the undoubled menace of the m-

gress is just this: "How are we going to frame a law that will reach the undoubted menace of the un-terlocking directorate in high places and when it is perverted, without at the same time threatening legitimate use of the interlocking directorate system upon which constructive business in many parts of the nation is built?

tion is built?" There is no doubt, of course, that the to probe demonstrated that when inter-Pujo probe demonstrated that when inter-locking directorates are carried to an ex-treme, and among the high financiers of New York, it produces conditions that are vicious and undestrable. These it is the desire of congress to curb.

Honest Business

desire of congress to curb. **Honest Business.** But if indiscriminate legislation against the interlocking directorate is enacted, what becomes of legitimate business throughout the country outside of New York? Every American state contains scores or hundreds of industrial and corporate or commercial enterprises, the boards of direc-tors of which are composed of men who are also on the directorates of other corpora-tions that, theoretically, might have business dealings with them. In other words, the same man may be a director in a bank and a director in a railroad which might, con-ceivably, be a customer of that bank. This sort of thing is common and it is easily understood. It takes brains to direct big enterprises. There is not a surplus of that variety of brains in this country. In innumerable communities, the same men may serve on the directorates of several

innumerable communities, the same men may serve on the directorates of several corporations from sheer necessity, since the country simply does not produce highcountry calibred brains or wealth in sufficient quantities to furnish directors for all con-cerns without, at many points, overlapping.

What Might Happen.

What Might Happen. What Might Happen. These men serve on joint or interlocking directorates for no sinister purpose of plunder, to stifle competition or throttle or bottle initiative and enterprise. As a simple matter of community service, they serve to represent substantial interest of stockholders, small investors, widows, etc., as well as legitimate business interests. If the straight technical line was drawn and the interlocking directorate was either abelished, or its maintenance made obscure and devious, what would happen? The effect would be to drive from valu-able public service, to disfranchise them from the rights and privileges of the average etitizens, thousands of the highest type of business then in the country. Chambers of commerce the country over are protesting against this.

Perhaps Worse

Another menacing possibility is that the Sherman anti-trust law may either be emasculated or wholly destroyed by hazy or indefinite or dangerous additions

it now is, the government can get through prosecutions under the law. tion through prosecutions under the law. The lawyers in congress are asking if a law is cluttered with numberless new action the law the law is cluttered with numberless new clauses if the latter will not turn out loop-holes for the escape of that identical class f undesirable business practice against which the law has thus far proved so efof undestrable business

fectual. Will It Stand Patf

Will It Stand Part The amended interlocking directorate bill is vastly milder than its stern predecessor. But it still is full of ambiguities and, some members think, danger. It leaves too much up in the air, and too much to the broad discretion of the courts. Chairman Henry D. Clayton, of the house judiclary committee. has told your representative that it is the desire of the committee to exempt legiti-mate business from the drastic operation of the law. But he, as well as others, is un-certain as to how this is to be accompilshed in a constitutional manner. All these perplexing considerations have given rise to distinct sentiment in some guarters, that it is best to leave this dan-gerous field alone for the present. Adoption of this course would enable the party to go before the country with a splendidly con-

of this course would enable the party to go before the country with a splendidly con-structive and attack-proof program of the currency and tariff and good roads laws. If, in the future, it should be deemed advisable to enact legislation clarifying the corporation situation, steps could then be taken at a time when the country has had opportunity to recover from previous fundamental legislation

THE OLD-FASHIONED BACK YARD AND ITS USE

Editor Constitution Oh, for the old fashioned back yard for our children to play in that they might be kept off of the streets! How many mothers and fathers are saying just this to themsell as every day, and often to others, sometimes, to be met by the reply. "Well, if you have a back yard the children will not play in it." Now, most of our back yards are not large enough to interest a chicken much less a child. They are miserable little pens, enclosed in ugly fences, which serve no useful purpose what-soever, merely eye-sores, without excuse for being.

Throw all the back vards together, turning them into parks, courts, plazas, play-grounds, places of pleasure and beauty public enough to be helpful, private enough public enough to be helpful, private croug-to be restful away from most of the dust, yet close enough to be within call of mother interpret children would yet close enough to be within call of mother Here all the neighborhood children would play and the grown folks would meet less formally than now and the nurses might be persuaded to keep off the streets with our babies. We would like out of doors more: we would take great pride in the keeping of our block, whether it be plax-ground, park or garden, or a combination of the city offered the women a prize for the most beautiful and best equipped play-ground, the money to go to still further-improvements Away with the back fence' What good

Away with the hack fence' What good are they anyhow' Let Atlanta, the pro-gressive, begin the good work, and in ten years in the citles of America the hideous years in the cities of America the hideous old back fence will no longer.offend the eye and cut up the children's natural play-ground into a series of ugiv, useless little pens. If we agritate this move, or strive forward, of course there will be a thousand forward, of course there will be a thousand objections made (remember when the front fences went?). Well, for every objection there is an excellent answer ready. I called in the neighborhood children today and asked them how they liked the plan You should have heard them shout. They have long felt the need, though they did not know how to express it Let Atlanta be the first to give to ber children these safe our-of-door child gardens, and she will have a thousand followers in less than one year H R. good now accomplished by the Sherman law might be wholly nullified by confusing, conflicting and vague additions.

The suggestion that leaders are debating the wisdom of postponing action on the interlocking directorate situation may, after all, show the way out of a delicate crisis. The country has been treated to two capital legislative operations, those on the tariff and the currency system. It has as yet had no adequate opportunity to recover from the effect of either. To burden it with a third and doubtful experiment might be dangerous. To defer that experiment until business shall have a breathing spell free of eternal uncertainty may be the part of prudence from the political no less than from the patriotic standpoint. For there is no doubt that the party can safely stand pat before the country on the tariff and the currency. Later, if further drastic legislation is needed, there will be nothing to prevent it. In the meantime, business will have resumed its normal condition.

It is encouraging that the president and congress are fully awake to the situation. The demand is, emphatically, for construct ive caution.

The explanation of the financial success of these men is found in one factthey knew the game of business almost as well as the game of inventing. Sometimes, indeed in the case of Edison very often, they had to fight long, hard and costly battles for their rights. Our age is, necessarily, one of specialism, and it is not to be expected that the man with the creative turn shall have also the commercial knack. Fascination of Railroading.

Men cannot be long in touch with the transportstion industry without realizing that, deepite the increasing burden and com-plex problems constantly demanding atten-tion, railroading has a fascination for those engaged in it which never seems to diminish. This is peculiarly true in the electric rail-way field, where problems are ever-chang-ing in character and where the progress of electrical engineering, and of operation, the broad yet close relations with the great nubbroad yet close relations with the great pubbroad yet close relations with the great pub-lic and the mechanical aspects of the indus-lic and the mechanical aspects of the indus-try demand the most careful annithen study. The "call of the rail" is as real a challenge to men of red blood and keen minds as the sustained impulse to employ onc's talents as elected chairman of the committee and . W. Florence secretary. There, are six candidates for treasurer terest in railroad problems is never lost.

JOHN REED IN MEXICO

Word Pictures of War by an American Kipling

Hot from the front has come John Reed's first "story" of Mexico. By holding our presses we just had time to catch the April number now on the news-stands. It's literature. What Stephen Crane and Richard Harding Davis did for the Spanish-American War in 1898, John Reed, 26 years old, has done for Mexico. You see that beautiful, blood-drenched country with freshly dug graves crowding the public roads. You see glorious, drunken nights of revelry where mirth is turned to tragedy by jealousy fired with too generous gulps of solol-for even in war sparkling eyes and red lips sway the passions of men. You see General Urbina, surrounded by his gaily decked fighters, traveling with his mother and his mistress. And for the first time you will understand this monstrous, paradoxical struggle waging at our very doorstep. Yes, Reed's story is literature.

Noted Labor Leader Leaves Denver for Trinidad After Being Warned.

Denver, Colo., March 22.—"Mother" Mary Jones, the aged strike leader, eff tonight for Trinidad, in defiance if military orders. She went unac-tompanied, and her train was due to ar-ive at Trinidad early tomorrow more-

"I certainly expect to be rearrested

"I certainly expect to be rearrested the moment I step from the train." said "Mother" Jones tought, "and I will go back to the hospital as the soldiers have the bayonets and I have nothing but the constitution." Governor Ammons and General Chase had not been advised of her departure up to a late hour tonight, but Gover-nor Ammons, discussing the strike sit-uation generally, declared he hoped "Mother" Jones would remain out of Trinidad, "for I certainly believe her presence there, even if she is arrested, will result in bloodshed." "If she remains.' he continued, "it will be in direct defiance to the state, and it scents hardly fitting that the state should be insulted by the very people who have made it necessary for

people who have made it necessary fo the state to spend more than a had million dollars to keep peace and or

der. "I have given the state militia no further orders in regard to 'Mother Jones, and so fat as I know none wil be given, but in this strike you cannot tell what conditions will arise at any time."

Horse e L Hawkins, attorney for the "hered Mune Workers of America, to-light said in event "Mother" Jones is seriested in Trinidad, the supreme ourt of the state will be asked to take "righnal juitsdiction in its habets cor-nus proceedings, "It having been dem-mistrated by previous habeas corpus noceedings in Trinidad that 'Mother' one's can get no relief from the district ourts.",

Fight to habile his clients ense in any manner he deems fit and proper I am not antagonistic to Smith nor to Con ley And I'm not going to be Smith and I will come to terms at the prop-er time, and don't worry over that.' William Smith, in a statement fol-lowing his sensational card published in Saturday's Constitution, said that he felt no personal animosity toward Detective Burns, and that if Burns came to hum in a proper spirit, terms could easily be reached "I have no particular objections to permitting Burns to see Conley,' he said "But I am not going to let Burns run rough-shed over me and my client Conley is as worthy of pro-tection as any prisoner "Conley doesn't mind facing Burns He is more willing to face him than Frank was to face the detectives when they tried to see him before the trial The only thing I want to be assured

The state of Georgia is on trial not Leo Frank The church, the Christian people of this city and state are on trial The eye of the nation is upon us Shall we be true to ourselves and to our state and to the ideals of de-meaned in hearing and hearing tha to our state and to the ideals of de-mocracy in hearing and heeding the demands of justice? The Outlook one of the most impartial, even as one of the most influential, publications in the nation, after investigating this case on its own initiative and reviewing the various phases, declares for a new trial New York and Chicago papers, editorially, give no less frank and forceful expression to similar convic-tions

Frank was to face the detectives when they tried to see him before the trial The only thing I want to be assured of is just treatment of my chent and myself If Burns ull agree to this very well We can then reach an agreement" Luther Rosser senior counsel for the defense and the first attorney en ployed for Franks counsel returns this morning from Gainesville, where he has been fighting a case in the courts of Hall county Justice demands that truth shall prevai, that the guilty shall be pun-ished that the innocent shall not suf-fer, that the great laws of brotherhood and life which all the laws of God,
